OUTDOOR RANGE

Flag Spinner

The Flag Spinner boasts three variables including 2, 3 or 4 arm flag configurations as well as single or double sided print panels for outdoor application. These systems are wind propelled and work in principal the same as vertical axis wind turbines. It is self-starting; when the wind increases the product rotates due to a fixed blade design. Fixed blade designs prevents over speeding. These systems accommodate the Extreme 3 Flag which includes reinforced upright extremities.

An optional solar panel including LED lighting may be added creating nighttime emphasis on graphics and or product offering to maximise marketing strategy.

Cloth Prints

Flag Spinner Solar Lighting

The Flag Spinner Solar Lighting is a steel constructed system including a battery / electrical housing, housed led lighting, upright pole and solar panel mount. Respective offerings include a specific designed solar panel; battery powered lighting system for each of the three offerings - 2, 3 and 4 arms. Solar configurations include LED lighting that project onto each print panel face creating night-time emphasis on graphics and on product offering.

Once the system is powered it will turn on automatically at night time, switch off automatically at day time and recharge the battery to be on standby for the next evening. No electricity required and these systems are self-sufficient.
